

Lionel Locomotives compatible with LCS SensorTrack™

Listed below are all the previously produced Lionel Legacy locomotives which are equipped with the IR transmitter. These are 100% compatible with the new IR SensorTrack. All Vision locomotives and all current production of Legacy locos are equipped with the IR Sensor. Older TMCC locomotives without the IR transmitter can still be used with other Layout Control System components, including LCS WiFi and the free LCS App. See www.lionel.com.lcs for more information about the LCS system.

This list current through Fall 2013.
